The above data is used to calculate if a fair market is being made in the shares of WSRA. 40% of recent trading days are positive or bullishly biased and 60% of trading days are negative or bearishly biased. There is a bearish market being made in WSRA in the past 37 trading days where shares traded.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock WSRA compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused WSRA's price to rise
2. If Friction Factor is negative, more selling than buying caused WSRA's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or
