Friction Factor calculates if a fair market is being made in the shares of ARGYF. 45% of the previous 20 trading days have been positive or bullish-biased and 55% have been negative or bearish-biased.

Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. The Commission has stated that bona-fide market-making DOES NOT include activity that is related to speculative selling strategies for investment purposes of the broker-dealer and is disproportionate to the usual market making patterns or practices of the broker-dealer in that security. Likewise, where a market-maker posts continually at or near the best offer but does not also post at or near the best bid, the market-maker's activities would not generally qualify as bona-fide market-making. Moreover, a market-maker that continually executes short

sales away from its posted quotes would generally not be engaging in bona-fide market-making.

BUYINS.NET monitors ARGYF market-makers daily for compliance with Fair Market-Making Requirements.

About Avanti Energy

Avanti Energy is focused on the exploration, development and production of helium across western Canada and the United States. Avanti's professional oil and gas exploration and production team is actively targeting untapped potential helium reserves to help meet the increasing global demand for an irreplaceable and scarce element critical to advanced technology, medical and space exploration industries. For more information, please go to the Company's website at www.avantienergy.com.

About BUYINS.NET

BUYINS.NET, <http://www.buyins.net>, monitors trading in all US stocks in real time and maintains massive databases of short sale and naked short sale time and sales data, short squeeze SqueezeTrigger prices, market-maker price movements, shareholder data, statistical data on earnings, sector correlation, seasonality, hedge fund trading strategies and comparable valuations. Reports include:

REGULATORY & COMPLIANCE NEWS

Friction Factor - market-maker surveillance system tracking market-makers to determine Price Friction and compliance with new "Fair Market-Making Requirements".

RegSHO Naked Shorts - tracks EVERY failure to deliver in all US stocks and all Threshold Security Lists daily for which stocks have naked short positions.

INVESTMENTS & TRADING

SqueezeTrigger - 40 billion cell database tracks EVERY short sale (not just total short interest) in all US stocks and calculates volume weighted price that a short squeeze will begin in each stock.

Earnings Edge - predicts probability, price move and length of move before and after all US stock earnings reports.

Seasonality - predicts probability, price move and length of move based on exact time of year for all US stocks.

Group Trader - tracks sector rotation and stock correlation to its sector and predicts future moves in ALL sectors and industry groups.

Pattern Scanner - automates tracking of technical patterns and predicts next move in stocks.

GATS - tracks all strategies.
