

## BUYINS.NET Issues VERSUS Technologies SqueezeTrigger Report

- **Approximately 2.7 Million Total Shares Shorted in US Since August 2022**
- **Approximately 1.27 Million Total Shares Shorted in Canada Since June 2022**
- **Short Squeeze Has Begun in Both Countries**

February 27, 2023 / M2 PRESSWIRE / BUYINS.NET, <http://www.buyins.net>, a leading provider of Regulation SHO compliance monitoring, short sale trading statistics and market integrity surveillance, has initiated coverage on VERSES Technologies, Inc. (OTCQX: VRSSF) (NEO: VERS) after releasing the latest short sale data through February 23, 2023. The total aggregate number of shares shorted in the US since August 2022 is approximately 2.7 million shares. On average approximately 68% of daily trading volume is short selling. The SqueezeTrigger price for all VRSSF shares shorted is \$0.62. A short squeeze is expected to begin in the US shares when they exceed this level. In Canadian trading (NEO: VERS) approximately 1.27 million total shares have been shorted in the same time period at approximately C\$0.79. A short squeeze has begun as the stock prices have exceeded the SqueezeTrigger Price in both countries.

Friction Factor calculates if a fair market is being made in the shares of VRSSF. 47% of the previous 19 trading days have been positive or bullish-biased and 53% have been negative or bearish-biased.

Regulation SHO requires bona-fide market-making activities to include making purchases and sales in roughly comparable amounts. The Commission has stated that bona-fide market-making DOES NOT include activity that is related to speculative selling strategies for investment purposes of the broker-dealer and is disproportionate to the usual market making patterns or practices of the broker-dealer in that security. Likewise, where a market-maker posts continually at or near the best offer but does not also post at or near the best bid, the market-maker's activities would not generally qualify

as bona-fide market-making. Moreover, a market-maker that continually executes short sales away from its posted quotes would generally not be engaging in bona-fide market-making.

BUYINS.NET monitors HUGE market-makers daily for compliance with Fair Market-Making Requirements.

### **About VERSES Technologies**

Veres Technologies Inc. develops suite of integrated technologies that offer spatial rights management capabilities to enable dynamic workflows, verifiable traceability, intelligent automation, and collaborative ecosystems that address the need for multi-party privacy, security, and interoperability by design. The company offers technologies such as KOSM, network operating system for distributed intelligence and WAYFINDER, Optimize warehouse picking, slotting, and capacity by bridging the gap between digital systems and physical operations. The company was formerly known as Veres Labs, Inc. and changed its name to Veres Technologies Inc. in July 2021. The company was founded in 2017 and is based in Los Angeles, California.

### **About BUYINS.NET**

BUYINS.NET, <http://www.buyins.net>, monitors trading in all US stocks in real time and maintains massive databases of short sale and naked short sale time and sales data, short squeeze SqueezeTrigger prices, market-maker price movements, shareholder data, statistical data on earnings, sector correlation, seasonality, hedge fund trading strategies and comparable valuations. Reports include:

#### **REGULATORY & COMPLIANCE NEWS**

Friction Factor - market-maker surveillance system tracking market-makers to determine Price Friction and compliance with new "Fair Market-Making Requirements".

RegSHO Naked Shorts - tracks EVERY failure to deliver in all US stocks and all Threshold Security Lists daily for which stocks have naked short positions.

#### **INVESTMENTS & TRADING**

SqueezeTrigger - 40 billion cell database tracks EVERY short sale (not just total short interest) in all US stocks and calculates volume weighted price that a short squeeze will begin in each stock.

Earnings Edge - predicts probability, price move and length of move before and after all US stock earnings reports.

Seasonality - predicts probability, price move and length of move based on exact time of year for all US stocks.

Group Trader - tracks sector rotation and stock correlation to its sector and predicts future moves in ALL sectors and industry groups.

Pattern Scanner - automates tracking of technical patterns and predicts next move in stocks.

GATS - tracks all strategies.
