## AMBS SHORT SELLERS

**Starting in late 2012 short sellers have consistently shorted AMBS. Shorts have increased their activity which warrants further investigation. Buyins.net will report the results of its surveillance on a monthly basis.**

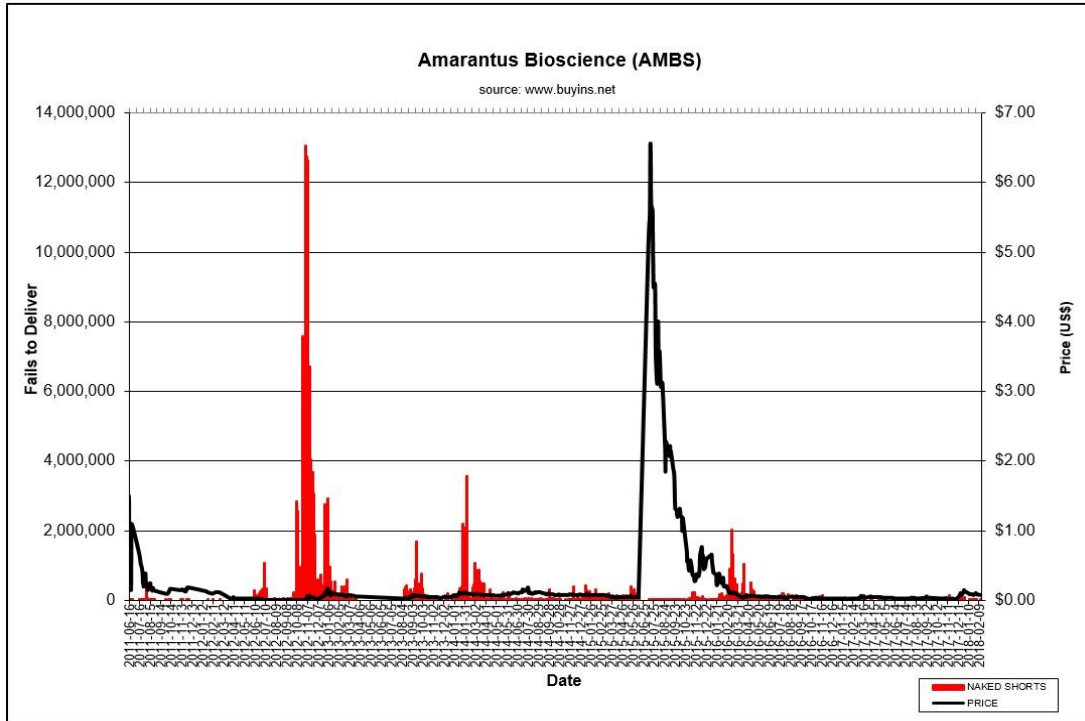

## OVERVIEW OF AMBS SHORT SALE DATA

After careful analysis of AMBS short sale, naked short sale and market maker friction factor data it is clear that AMBS has had issues with short sellers who have been especially aggressive since mid 2015. Short sellers have been building a sizable

position in shares of AMBS as a percentage of total trading volume and market makers have made a neutral market lately. New evidence of daily short sellers shorting shares of AMBS has now come to light as the SEC has

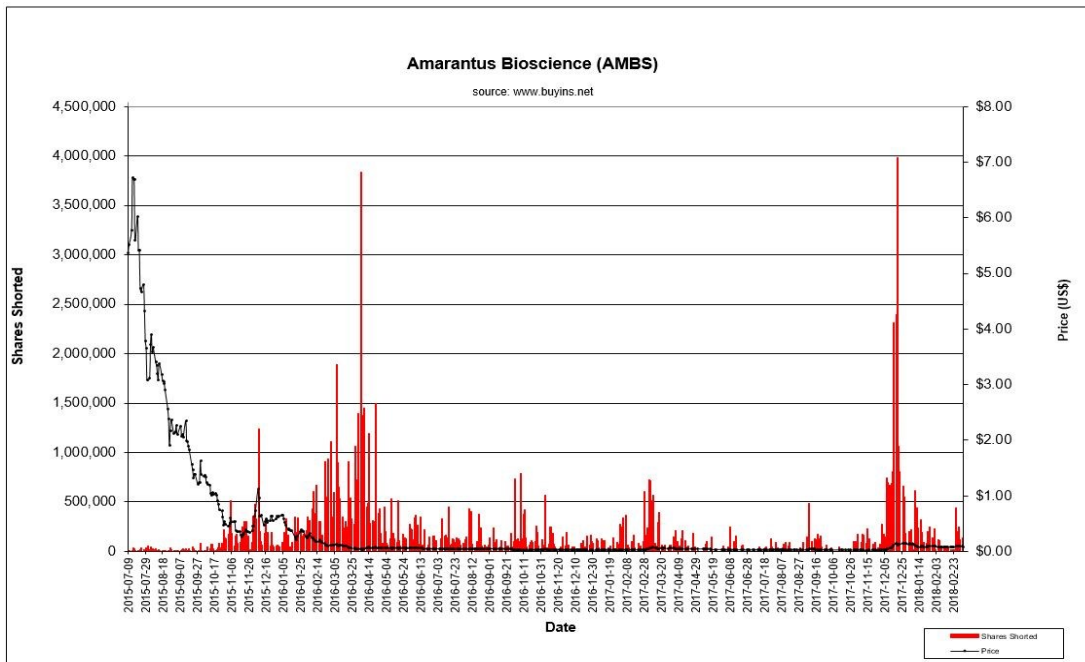

finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting AMBS from abusive shorting is a high priority.

## DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN AMBS

Failures to Deliver in AMBS have occurred as short sellers were lax at complying with Regulation SHO starting in mid 2012. Buyins.net will continue to monitor and report short sellers for non-compliance with Regulation SHO borrow requirements.

## NEW DAILY SHORT SALE TRADING VOLUME STARTING 7-9-15

Shorts have been shorting AMBS on a daily basis. An average of 31.64% of daily trading volume is short selling. This is higher than what is considered normal.

The above data is used to calculate if a fair market is being made in the shares of AMBS. 51% of recent trading days are positive or bullishly biased and 49% of trading days are negative or bearishly biased. There is a neutral market being made in AMBS in the past 35 trading days.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused AMBS's price to rise
2. If Friction Factor is negative, more selling than buying caused AMBS's price to fall
3. If Friction Factor is 0, there was no discernible activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.

### WHY BUYINS.NET IS BEST CHOICE FOR AMBS MARKET INTEGRITY

The data we provide is extremely useful for AMBS for the following reasons:

1. Stop naked short selling in shares of AMBS
2. Break the market maker hold on Level II box causing so much price friction
3. Our SqueezeTrigger Reports that cross newswires and are sent to our 750,000 users help break the rest of the shorts
4. Discourage new short sellers from shorting your stock
5. Stop the negative perception that dropping stock price places on normal day to day business operations
6. Combined all of these facets help to stop the daily drain that the short attacks have on the company.
