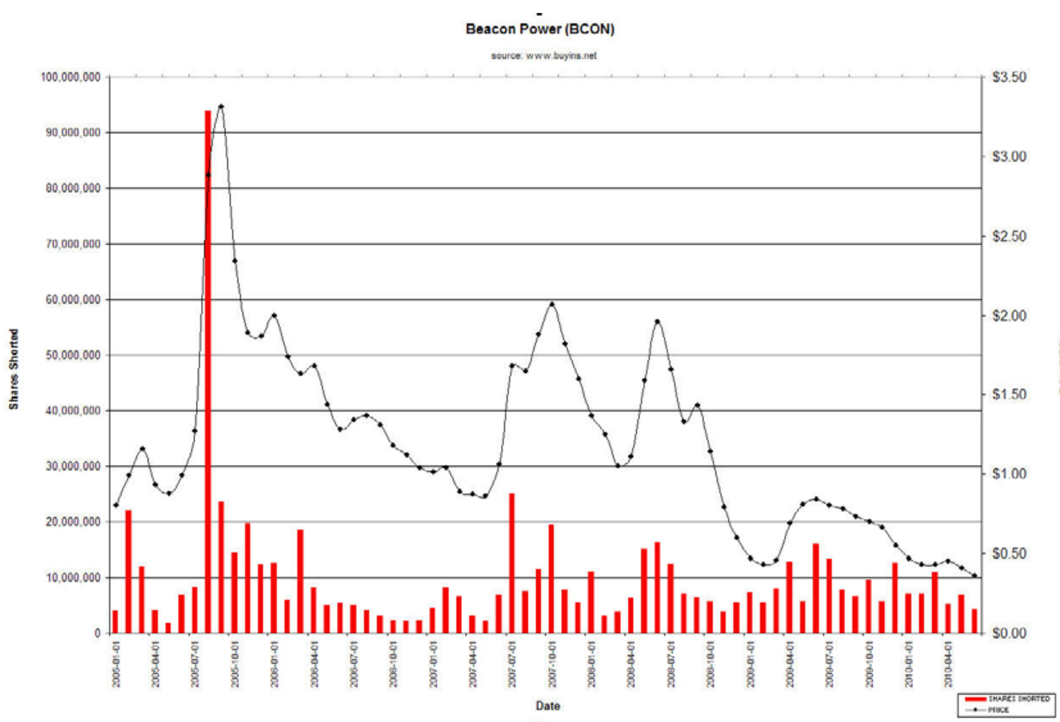
BCON SHORT SELLERS



Starting in 2005 short sellers have actively shorted BCON. Shorts are consistently continuing this activity which warrants close investigation. Buyins.net will report the results of its surveillance on a monthly basis.

OVERVIEW OF BCON SHORT SALE DATA

After careful analysis of BCON short sale, naked short sale and market maker friction factor data it is clear that BCON has persistently had issues with short sellers who have been aggressive over the years. Short sellers have been building a sizable position in shares of BCON and market makers have made a bearish market lately. New evidence of daily short sellers shorting shares of BCON has now come to light as the SEC has finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting BCON from abusive shorting is a high priority.

The above data is used to calculate if a fair market is being made in the shares of BCON. 37% of recent trading days are positive or bullishly biased and 63% of trading days are negative or bearishly biased. There is a bearish market being made in BCON in the past seven weeks.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused BCON's price to rise
2. If Friction Factor is negative, more selling than buying caused BCON's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.
