CBAI SHORT SELLERS

Starting in 2008 and through May 2010 short sellers aggressively shorted CBAI which resulted in the stock price dropping. Shorts have once again been building a new position as shares of CBAI have attempted to move higher in recent months.

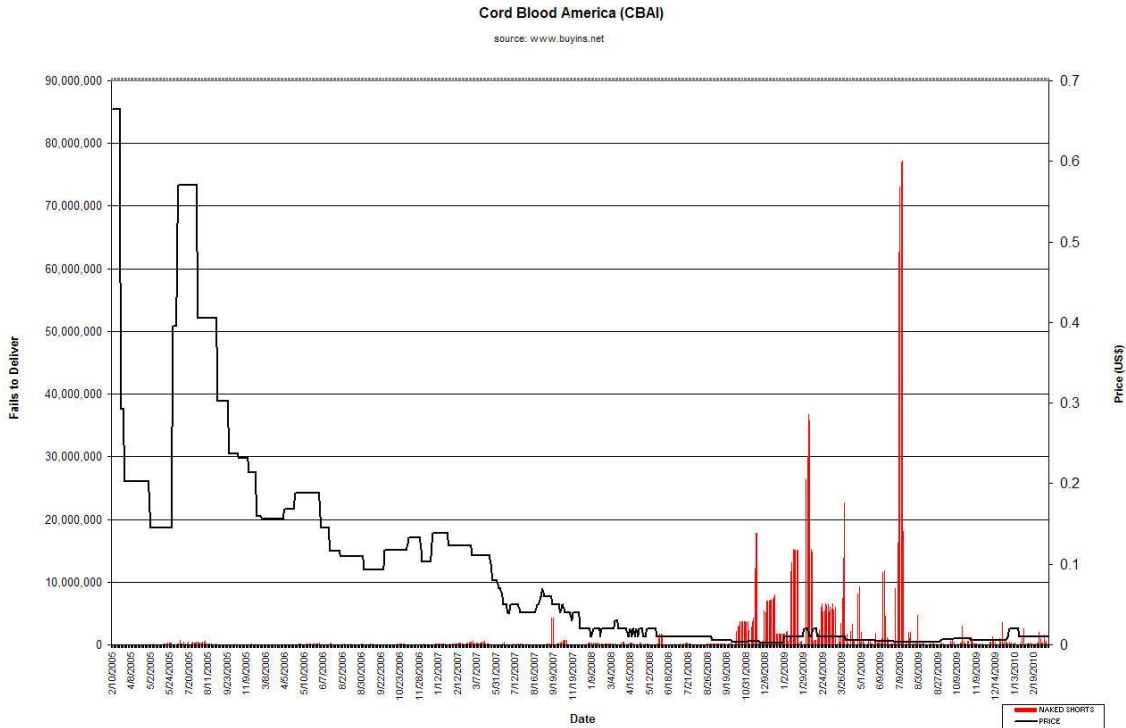

OVERVIEW OF CBAI SHORT SALE DATA

After careful analysis of CBAI short sale, naked short sale and market maker friction factor data it is clear that CBAI has historically had persistent issues with short sellers which have previously decreased the company's market capitalization

significantly. Short sellers have been rebuilding a substantial position in shares of CBAI and market makers have been making a bearish market as of late. New evidence of daily short sellers shorting shares

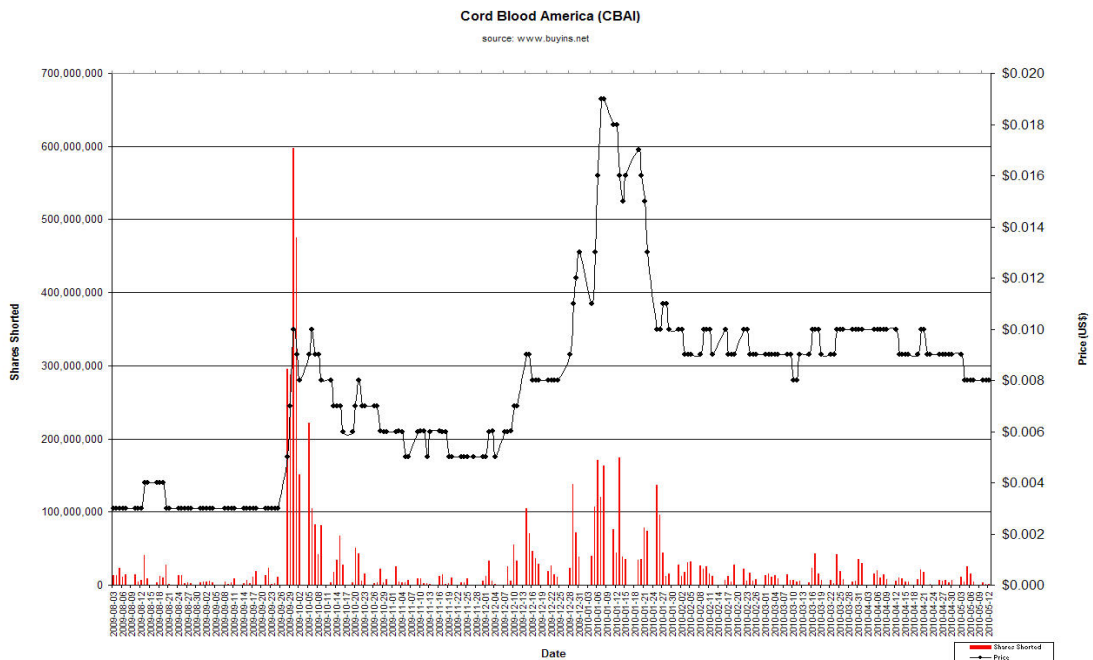

of CBAI has now come to light as the SEC has finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting CBAI from abusive shorting is once again a priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN CBAI

Failures to Deliver in CBAI have been an issue in the past as short sellers have been lax in complying with Regulation SHO. Buyins.net will continue to monitor short sellers for compliance with Regulation SHO borrow requirements.

NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09

Shorts have been consistently shorting CBAI on a daily basis. An average of 29.81% of daily trading volume is short selling.

The above data is used to calculate if a fair market is being made in the shares of CBAI. 39% of recent trading days are positive or bullishly biased and 61% of trading days are negative or bearishly biased. There is a bearishly-biased market being made in CBAI in the past eight weeks.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused CBAI's price to rise
2. If Friction Factor is negative, more selling than buying caused CBAI's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.

WHY BUYINS.NET IS BEST CHOICE FOR CBAI MARKET INTEGRITY

The data we provide is extremely useful for CBAI for the following reasons:

1. Stop naked short selling in shares of CBAI
2. Break the market maker hold on Level II box causing so much price friction
3. Our SqueezeTrigger Reports that cross newswires and are sent to our 720,000 users help break the rest of the shorts
4. Discourage new short sellers from shorting your stock
5. Stop the negative perception that dropping stock price places on normal day to day business operations
6. Combined all of these facets help to stop the daily drain that the short attacks have on the company.
