## CLRH SHORT SELLERS

Short sellers have shorted CLRH lightly in the past but have become aggressive since fall 2009. The activity has warranted that Buyins.net carefully monitor market makers and short sellers for Reg SHO compliance.

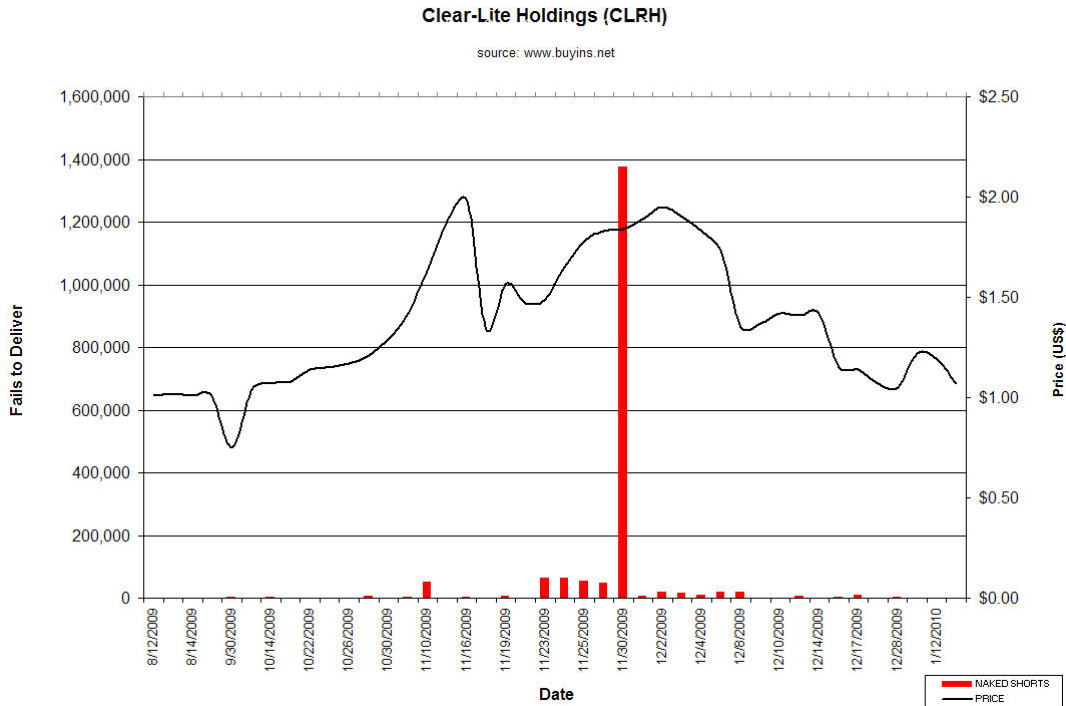

## OVERVIEW OF CLRH SHORT SALE DATA

After careful analysis of CLRH short sale, naked short sale and market maker friction factor data it is clear that CLRH is having issues with short sellers which have decreased the company's market capitalization. Short sellers have been

building a sizable position in shares of CLRH and market makers have been making a bullish market in the stock up until recently. New evidence of daily short sellers shorting shares of CLRH has now come to light

as the SEC has finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting CLRH from abusive shorting is a priority.

## DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN CLRH

**There has been one period of significant failures to deliver. Buyins.net will continue to monitor short sellers for compliance with the borrowing requirements of Regulation SHO.**

## NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09

**This daily short volume chart of CLRH shows shorts have begun shorting the stock**

The above data is used to calculate if a fair market is being made in the shares of CLRH. 71% of recent trading days have been positive or had a bullish bias and 29% have been negative or had a bearish bias. There is an overall positive market being made in CLRH in the past six weeks.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused CLRH's price to rise
2. If Friction Factor is negative, more selling than buying caused CLRH's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.
