Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused CTDT's price to rise
2. If Friction Factor is negative, more selling than buying caused CTDT's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.
