The above data is used to calculate if a fair market is being made in the shares of DIMI. 67% of recent trading days are positive or bullishly biased and 33% of trading days are negative or bearishly biased. There is a bullish market being made in DIMI in the past 24 trading days.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock DIMI compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused DIMI's price to rise
2. If Friction Factor is negative, more selling than buying caused DIMI's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.
