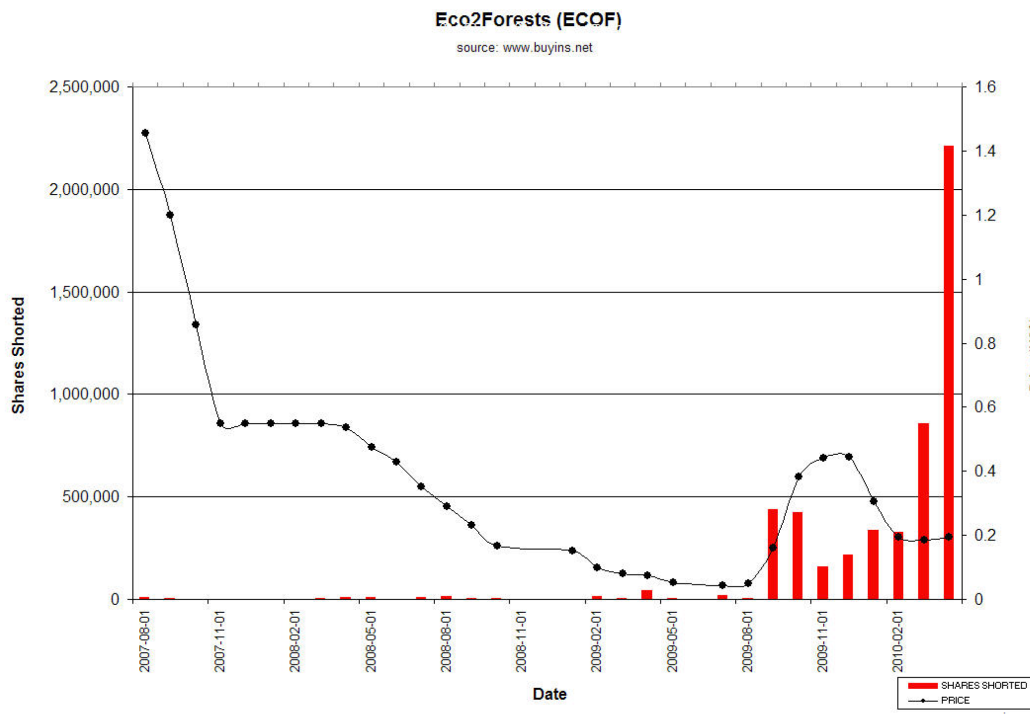
ECOF SHORT SELLERS

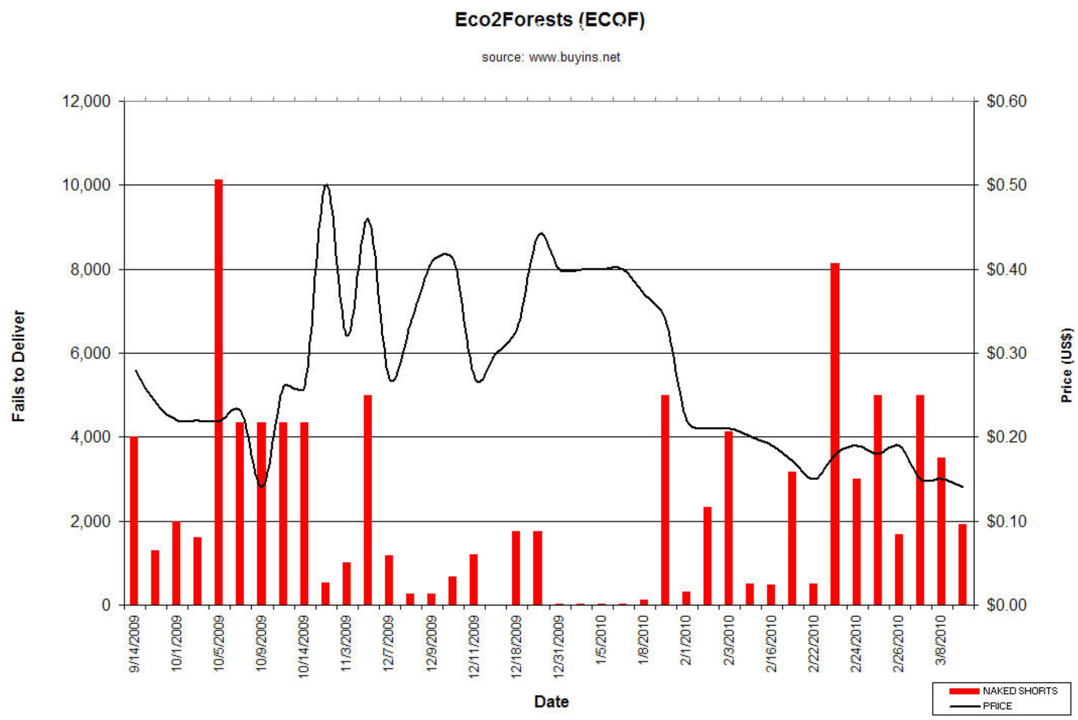


Short sellers have shorted ECOF in the past but have become aggressive since fall 2009. The activity has warranted that Buyins.net carefully monitor market makers and short sellers for Reg SHO compliance.

OVERVIEW OF ECOF SHORT SALE DATA

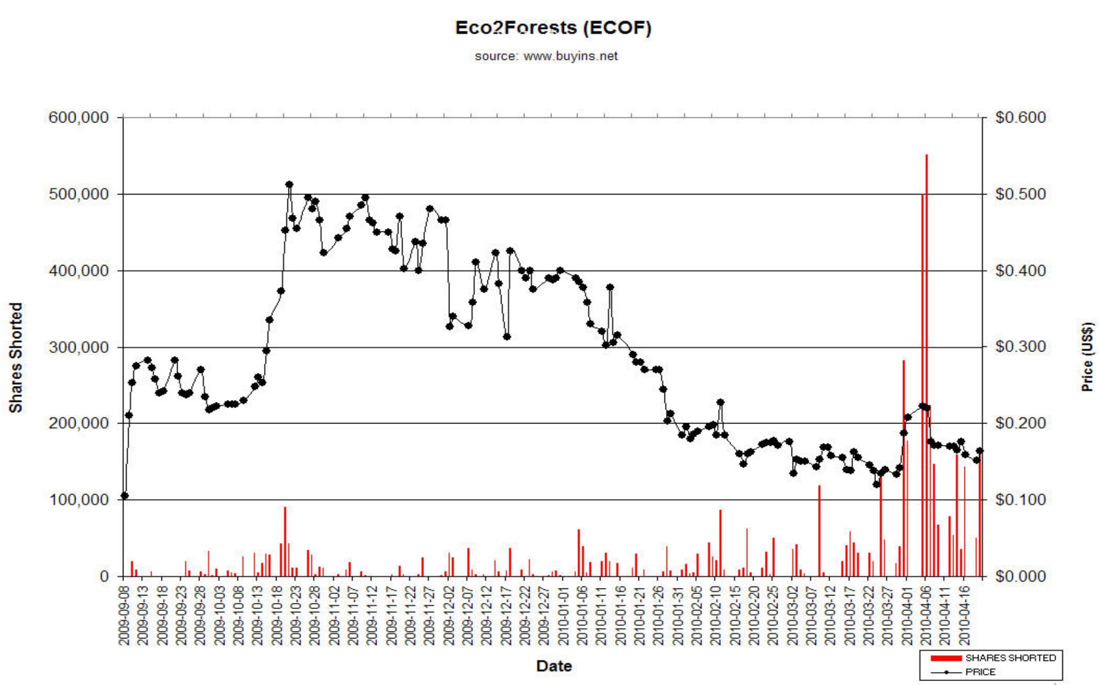
After careful analysis of ECOF short sale, naked short sale and market maker friction factor data it is clear that ECOF is having issues with short sellers which have decreased the company's market capitalization. Short sellers have been building a sizable position in shares of ECOF and market makers have been making a negative market in the stock. New evidence of daily short sellers shorting shares of ECOF has now come to light as the SEC has finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting ECOF from abusive shorting is a priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN ECOF



There have not been significant Fails to Deliver through March 9, 2010. Buyins.net will continue to monitor short sellers for compliance with the borrowing requirements of Regulation SHO.

NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09



This daily short volume chart of ECOF shows shorts have begun shorting the stock aggressively as of late. Approximately 44% of daily volume is short selling.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. **If Friction Factor is positive, more buying than selling caused ECOF's price to rise**
2. **If Friction Factor is negative, more selling than buying caused ECOF's price to fall**
3. **If Friction Factor is 0, there was no discernable activity either way**
4. **If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.**
