LIVE SHORT SELLERS

Starting in late 2010 short sellers have aggressively shorted LIVE. Shorts have increased this activity which warrants close investigation. Buyins.net will report the results of its surveillance on a monthly basis.

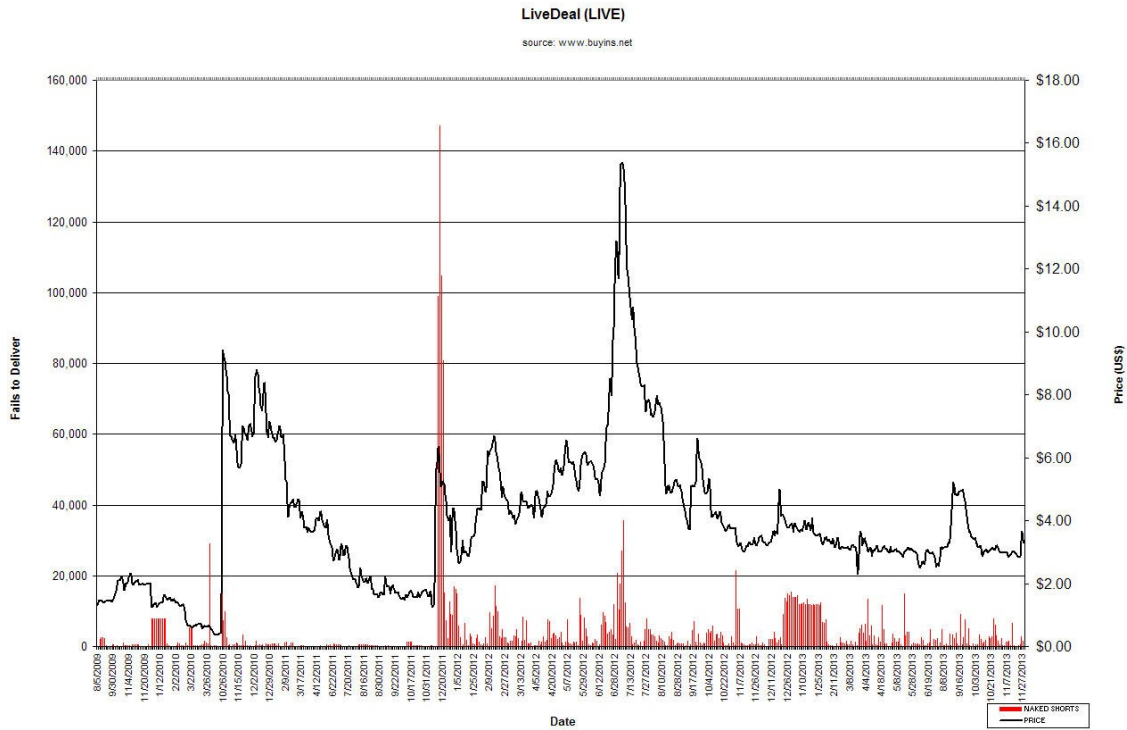

OVERVIEW OF LIVE SHORT SALE DATA

After careful analysis of LIVE short sale, naked short sale and market maker friction factor data it is clear that LIVE has had persistent issues with short sellers who have been aggressive over the last several years. Short sellers have been

building a sizable position in shares of LIVE and market makers have made a bullish market lately. New evidence of daily short sellers shorting shares of LIVE has now come to light as the SEC has finally given Buyins.net

access to DAILY short sale data which is updated every night. Protecting LIVE from abusive shorting is a high priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN LIVE

Failures to Deliver in LIVE are an issue as short sellers have been lax at complying with Regulation SHO since late 2011. Buyns.net will continue to monitor and report short sellers for non-compliance with Regulation SHO borrow requirements.

NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09

Shorts have been aggressively shorting LIVE on a daily basis. An average of 22.87% of daily trading volume is short selling.

The above data is used to calculate if a fair market is being made in the shares of LIVE. 62% of recent trading days are positive or bullishly biased and 38% of trading days are negative or bearishly biased. There is a bullish market being made in LIVE in the past 38 trading days.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused LIVE's price to rise
2. If Friction Factor is negative, more selling than buying caused LIVE's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.

WHY BUYINS.NET IS BEST CHOICE FOR LIVE MARKET INTEGRITY

The data we provide is extremely useful for LIVE for the following reasons:

1. Stop naked short selling in shares of LIVE
2. Break the market maker hold on Level II box causing so much price friction
3. Our SqueezeTrigger Reports that cross newswires and are sent to our 750,000 users help break the rest of the shorts
4. Discourage new short sellers from shorting your stock
5. Stop the negative perception that dropping stock price places on normal day to day business operations
6. Combined all of these facets help to stop the daily drain that the short attacks have on the company.
