OHGI SHORT SELLERS

Starting in mid 2015 short sellers have consistently shorted OHGI. Shorts have increased their activity which warrants further investigation. Buyins.net will report the results of its surveillance on a monthly basis.

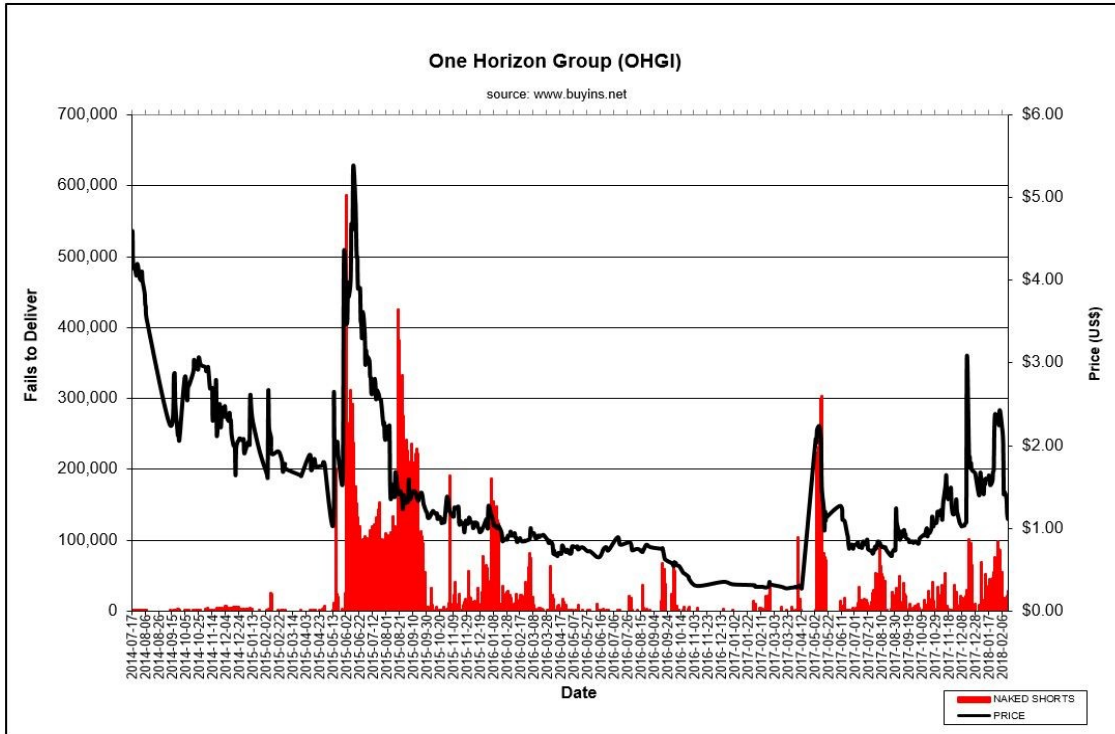

OVERVIEW OF OHGI SHORT SALE DATA

After careful analysis of OHGI short sale, naked short sale and market maker friction factor data it is clear that OHGI has had issues with short sellers who have been especially aggressive since mid 2015. Short sellers have been building a sizable

position in shares of OHGI as a percentage of total trading volume and market makers have made a slightly bearish market lately. New evidence of daily short sellers shorting shares of OHGI has now come to light as the SEC has

finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting OHGI from abusive shorting is a high priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN OHGI

Failures to Deliver in OHGI have occurred as short sellers were lax at complying with Regulation SHO starting in mid 2015. Buyins.net will continue to monitor and report short sellers for non-compliance with Regulation SHO borrow requirements.

Shorts have been shorting OHGI on a daily basis. An average of 48.14% of daily trading volume is short selling. This is higher than what is considered normal.

The above data is used to calculate if a fair market is being made in the shares of OHGI. 46% of recent trading days are positive or bullishly biased and 54% of trading days are negative or bearishly biased. There is a slightly bearish market being made in OHGI in the past 35 trading days.

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused OHGI's price to rise
2. If Friction Factor is negative, more selling than buying caused OHGI's price to fall
3. If Friction Factor is 0, there was no discernible activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.

WHY BUYINS.NET IS BEST CHOICE FOR OHGI MARKET INTEGRITY

The data we provide is extremely useful for OHGI for the following reasons:

1. Stop naked short selling in shares of OHGI
2. Break the market maker hold on Level II box causing so much price friction
3. Our SqueezeTrigger Reports that cross newswires and are sent to our 750,000 users help break the rest of the shorts
4. Discourage new short sellers from shorting your stock
5. Stop the negative perception that dropping stock price places on normal day to day business operations
6. Combined all of these facets help to stop the daily drain that the short attacks have on the company.
