OxySure Systems, Inc., a medical technology company, is engaged in the design, manufacture, and distribution of respiratory and emergency medical solutions. It provides OxySure Model 615, a portable emergency oxygen system. The company also offers complimentary products and solutions, including display wall boxes, oxygen wall signage, resuscitation bags, pulse oximeters, and automated external defibrillators, as well as thermal bags and replacement cartridges for its OxySure Model 615. Its products enhance the access to emergency oxygen that affects the survival, recovery, and safety of individuals in various areas of need. The company sells its products to institutional customers through distributors, sub-distributors, and sales agents in the United States and internationally. OxySure Systems, Inc. was founded in 2004 and is headquartered in Frisco, Texas.

Investment Highlights

- **PATTERN SCAN** predicts the price of OXYS expected to move up in the coming weeks based on the appearance of a 'Trend Line Break(5+)' pattern. Specifically, a SS Heikin Ashi 2 variant of Trend Line Break(5+) has been detected. The target is \$1.60.
- **GROUP CORRELATION** predicts the price of OXYS expected to move up to \$1.52 in the coming weeks.
- **SQUEEZETRIGGER** predicts that when ETRM closes above \$0.77, we expect a short squeeze to begin that could quickly drive the price of ETRM considerably higher.
- **VALUATION** ETRM has a current value of \$3.90 which means the stock is undervalued compared to its Price of \$0.89.

How WealthMakers Market Reads Work:

WealthMakers Market Reads™ provide you with market performance predictions based on proprietary technologies, trading algorithms and data to help you make better, more informed investment decisions. Here's a quick review of our predictive technologies:

- **EARNINGS** Most stock price histories show random or unpredictable movements around earnings reports. But some repeat the same pattern quarter after quarter, year after year. Earnings predicts probability, price move and length of move before and after all US stock earnings reports.
- **FRICTION FACTOR** Friction Factor is based on the relationship between the price of a stock and the volume at which it's bought and sold. Normal and abnormal Friction factor patterns can help you time your buying and selling decisions for maximum earnings potential.
- **GATS** The Global Automated Trading System (GATS) combines neural networks and genetic algorithms to reduce investment risks. GATS selects the highest probability trades in stocks, bonds, options, commodities, currencies and private equities, delivering precise, predictive and profitable data.
- **GROUP SECTOR** Certain institutions can exert buying or selling pressure over an entire industry group, pushing prices higher. Group Sector identifies stocks that most closely match their group's movement and generate powerful group consensus trading signals to help you profit from the herd mentality.
- **PATTERN SCAN** This technology automatically tracks "Trigger Events" that positively or negatively affect the value of a stock — or its perceived value among analysts — ranging from price fluctuations to natural disasters and political shifts. The results reveal patterns that can predict market movements.
- **EVENTS** Events describe the current technical situation in your stock. It displays the technicals, trend conditions and seasonal factors and automatically discovers how that stock has performed in the trading days following the occurrences of the event or combination of events. This technology automatically scans using complex historical queries based on what event is taking place right now in the stock. It then displays the probability, expected return and number of trading days for the expected move.
- **RegSHO NAKED SHORTS** Tracks EVERY failure to deliver in all US stocks and all Threshold Security Lists daily for which stocks have naked short positions
- **SEASONALITY** Seasonality analyzes more than 20 years of data to determine if stocks have a long or short seasonal bias, how many trading days the move is expected to last, the probability of that move and the percentage move the stock is expected to make based on the seasonal bias.
- **SQUEEZE TRIGGER** Our proprietary database of more than 3,500,000,000 short sale transactions allows us to calculate the exact price at which the total short interest is short in each stock. Squeeze Trigger Alerts let you know exactly when a short squeeze will start and how to trade profitably.
- **VALUATION** A stock's value is a function of its forecasted earnings per share and forecasted earnings growth, as well as profitability, interest and inflation rates. Valuation use these metrics to determine at what price a stock is undervalued or overvalued, so that you can make investment decisions accordingly.
- **INSIDER** Significant stock sales or purchases by company "insiders" (officers or directors) can be a predictor of future price movements — up or down. The Insider strategy tracks these actions and correlates them with historical data to give you an investment edge.

Squeeze Trigger

Calculates the exact price at which a short squeeze will start.

OxySure Systems (OTC: OXYS) has just triggered an alert where OXYS is crossing above its primary SqueezeTrigger Price, the price that a short squeeze can start in any stock. Given the amount that short sellers need to cover, it is predicted that OXYS could go up dramatically by December 22, 2014

The Cumulative Squeeze Trigger price for OXYS is \$0.77. This means that when OXYS closes above \$0.77 we expect a short squeeze to begin that could quickly drive the price of OXYS considerably higher.

- OXYS has hit the Squeeze Trigger price of \$0.77
- Based on the amount of value that short sellers need to cover, a short squeeze is predicted at \$0.77.
- Short Sellers will be forced to buy to cover short positions, sending the price higher.

Pattern Scan

Tracks "Trigger Events" that positively or negatively affect the value of a stock.

OxySure Systems (OTC: OXYS) is predicted to go up in coming weeks based on bullish technical trends that have appeared in the recent performance of the stock. OXYS has demonstrated Trend Line Break(5+) strategy SS Heikin Ashi 2 with a strength of 5.0/5. The higher the strength, the higher the probability of an accurate prediction.

- The price of OXYS expected to move up in the coming weeks.
- PatternScan has detected that a 'SS Heikin Ashi 2' pattern has appeared.
- Specifically, a SS Heikin Ashi 2 variant of Trend Line Break(5+) has been detected.
- This indicates a high probability that OXYS will move up in the coming weeks.

Group Sector

Identifies stocks that respond to group consensus "herd mentality" market movements.

OxySure Systems (OTC: OXYS) is predicted to go up as the top stocks in the Medical Industry have fired buy signals. The majority of the top stocks in the Healthcare sector have fired buy signals as of today. Group rotation is a phenomenon where institutions exert buying or selling pressure in an industry group, pushing prices of the group higher or lower relative to the general market. An industry can often lead or lag the market, and the most highly correlated stocks usually move in unison.

- The price of OXY is expected to move up in the coming weeks.
- OXY is strongly correlated (0.41) to stocks in the Medical Industry.
- These stocks have fired sell signals, and OXY is expected to follow.

Squeeze Trigger

We have a proprietary database of all trading in US stocks and maintain massive databases of short sale and naked short sale time and sales data, along with short squeeze SqueezeTrigger prices. We are the only firm that knows the exact price that a short squeeze will start in every US stock.

The Cumulative Squeeze Trigger price for OXYS is \$0.77.

This means that when OXYS closes above \$0.77 we expect a short squeeze to begin that could quickly drive the price of OXYS considerably higher.
