POPN SHORT SELLERS

Short sellers have actively shorted POPN in the past but have become aggressive since late 2009. The activity has warranted that Buyins.net carefully monitor market makers and short sellers for Reg SHO compliance.

OVERVIEW OF POPN SHORT SALE DATA

After careful analysis of POPN short sale, naked short sale and market maker friction factor data it is clear that POPN is having issues with short sellers which have decreased the company's market capitalization. Short sellers have been

building a sizable position in shares of POPN and market makers have been making a negative market in the stock overall but with a slight bullish bias on days with abnormal trading. New evidence of daily short

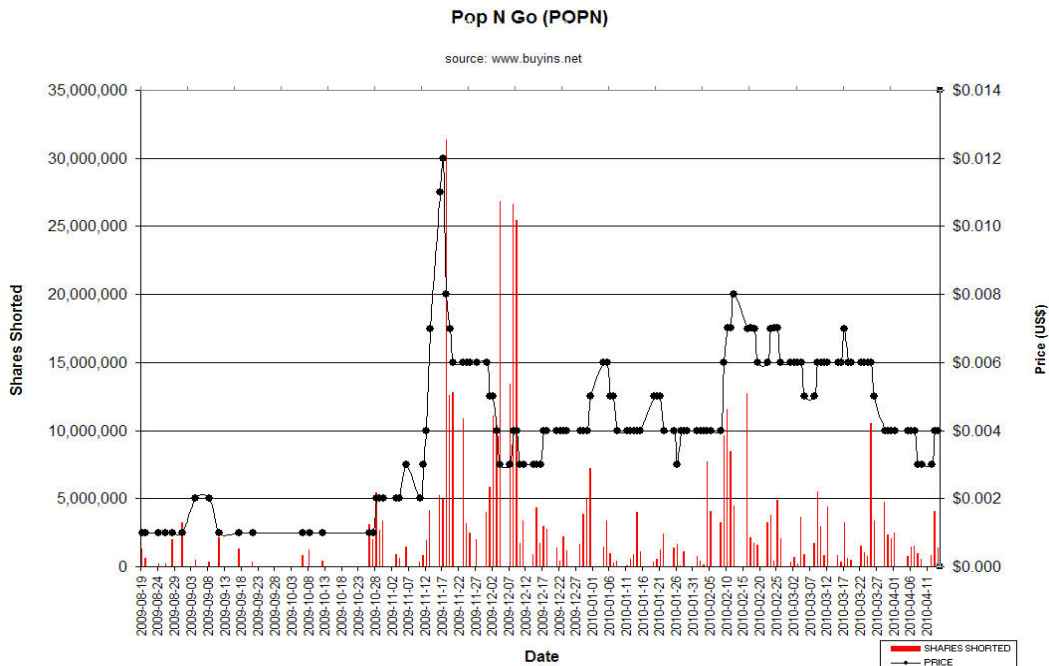

sellers shorting shares of POPN has now come to light as the SEC has finally given Buyins.net access to DAILY short sale data which is updated every night. Protecting POPN from abusive shorting is a priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN POPN

Significant Failures to Deliver in POPN began in 2007 and continue. Short sellers have been lax in complying with Regulation SHO. Buyins.net will continue to monitor short sellers for compliance with the borrowing requirements of Regulation SHO.

NEW DAILY SHORT SALE TRADING VOLUME STARTING 8-3-09

This daily short volume chart of POPN shows shorts have begun shorting the stock aggressively as of late. Approximately 39% of daily volume is short selling.
