RGIN SHORT SELLERS

OVERVIEW OF RGIN SHORT SALE DATA

After careful analysis of RGIN short sale, naked short sale and market maker friction factor data it is clear that RGIN has recently had issues with short sellers who have been very aggressive. Short sellers have been building a sizable position in

which is updated every night. Protecting RGIN from abusive shorting is a high priority.

DAILY FAILURE TO DELIVER DATA (NAKED SHORTS) IN RGIN

Failures to Deliver in RGIN have been an issue in the past as short sellers have been lax in complying with RegSHO. Buyins.net will continue to monitor and report short sellers for non-compliance with Regulation SHO requirements.

NEW DAILY SHORT SALE TRADING VOLUME STARTING 11-10-10

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It calculates number of net shares of buying or selling to move price +/- one cent.

Here is how to understand Friction Factor:

1. If Friction Factor is positive, more buying than selling caused RGIN's price to rise
2. If Friction Factor is negative, more selling than buying caused RGIN's price to fall
3. If Friction Factor is 0, there was no discernable activity either way
4. If Friction Factor is abnormal, it means that there is either a bearish bias or a bullish bias to how market makers are making market in your stock.
