Vantage Health Inc. operates as a mobile healthcare technology company. It is engaged in developing personalized and point-of-care screening using Apps based upon chemical sensing residing in a small device attached to a smartphone. It provides the Vantage Health Sensor, a nano-electronics, bio-informatics, and wireless technology that create mobile health applications. The company was founded in 2010 and is based in Redwood City, California.

## Investment Highlights

- **PATTERN SCAN** predicts the price of VNTH expected to move up in the coming weeks based on the appearance of a 'Trend Line Break(3)' pattern. Specifically, a ACT EOD variant of Trend Line Break(3) has been detected. The target is \$0.50.
- **SQUEEZETRIGGER** predicts that now that VNTH closed above \$0.095, we expect a short squeeze to begin that could quickly drive the price of VNTH considerably higher.
- **VALUATION** VNTH has a short squeeze value of \$2.85 which means the stock is undervalued compared to its price of \$0.12

## How WealthMakers Market Reads Work:

WealthMakers Market Reads™ provide you with market performance predictions based on proprietary technologies, trading algorithms and data to help you make better, more informed investment decisions. Here's a quick review of our predictive technologies:

- **EARNINGS** Most stock price histories show random or unpredictable movements around earnings reports. But some repeat the same pattern quarter after quarter, year after year. Earnings predicts probability, price move and length of move before and after all US stock earnings reports.
- **FRICTION FACTOR** Friction Factor is based on the relationship between the price of a stock and the volume at which it's bought and sold. Normal and abnormal Friction factor patterns can help you time your buying and selling decisions for maximum earnings potential.
- **GATS** The Global Automated Trading System (GATS) combines neural networks and genetic algorithms to reduce investment risks. GATS selects the highest probability trades in stocks, bonds, options, commodities, currencies and private equities, delivering precise, predictive and profitable data.
- **GROUP SECTOR** Certain institutions can exert buying or selling pressure over an entire industry group, pushing prices higher. Group Sector identifies stocks that most closely match their group's movement and generate powerful group consensus trading signals to help you profit from the herd mentality.
- **PATTERN SCAN** This technology automatically tracks "Trigger Events" that positively or negatively affect the value of a stock — or its perceived value among analysts — ranging from price fluctuations to natural disasters and political shifts. The results reveal patterns that can predict market movements.
- **EVENTS** Events describe the current technical situation in your stock. It displays the technicals, trend conditions and seasonal factors and automatically discovers how that stock has performed in the trading days following the occurrences of the event or combination of events. This technology automatically scans using complex historical queries based on what event is taking place right now in the stock. It then displays the probability, expected return and number of trading days for the expected move.
- **RegSHO NAKED SHORTS** Tracks EVERY failure to deliver in all US stocks and all Threshold Security Lists daily for which stocks have naked short positions
- **SEASONALITY** Seasonality analyzes more than 20 years of data to determine if stocks have a long or short seasonal bias, how many trading days the move is expected to last, the probability of that move and the percentage move the stock is expected to make based on the seasonal bias.
- **SQUEEZE TRIGGER** Our proprietary database of more than 3,500,000,000 short sale transactions allows us to calculate the exact price at which the total short interest is short in each stock. Squeeze Trigger Alerts let you know exactly when a short squeeze will start and how to trade profitably.
- **VALUATION** A stock's value is a function of its forecasted earnings per share and forecasted earnings growth, as well as profitability, interest and inflation rates. Valuation use these metrics to determine at what price a stock is undervalued or overvalued, so that you can make investment decisions accordingly.
- **INSIDER** Significant stock sales or purchases by company "insiders" (officers or directors) can be a predictor of future price movements — up or down. The Insider strategy tracks these actions and correlates them with historical data to give you an investment edge.

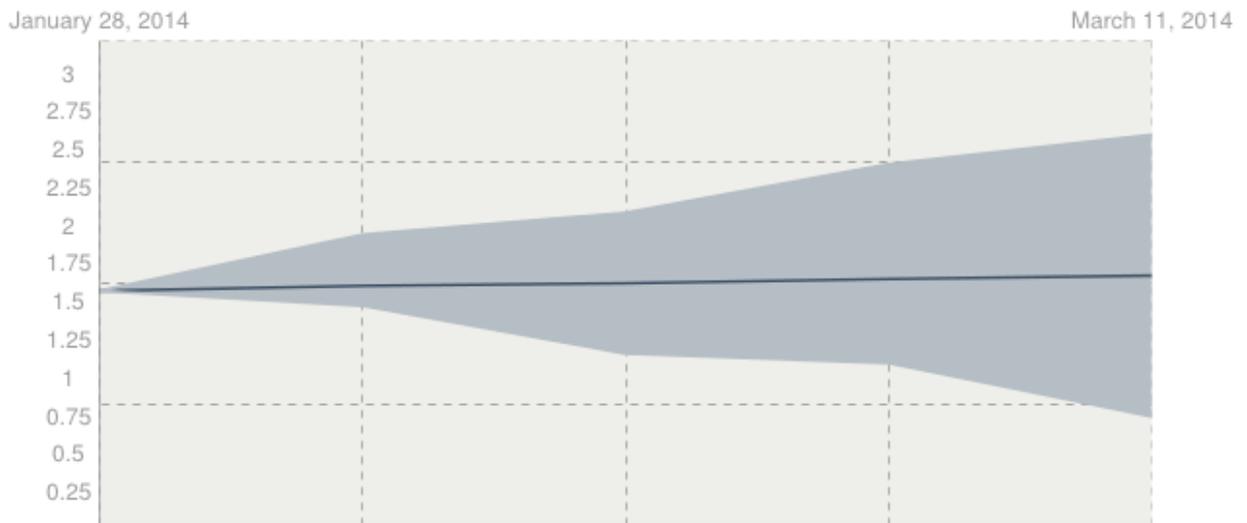

# Squeeze Trigger

Calculates the exact price at which a short squeeze will start.

Vantage Health Inc. (OTC: VNTH) has just triggered an alert where VNTH is crossing above its primary Squeeze Trigger Price, the price that a short squeeze can start in any stock. Given the amount that short sellers need to cover, it is predicted that VNTH could go up dramatically by March 31, 2014

The Cumulative Squeeze Trigger price for VNTH is \$0.095.

This means that now that VNTH closed above \$0.095, we expect a short squeeze to begin that could quickly drive the price of VNTH considerably higher.

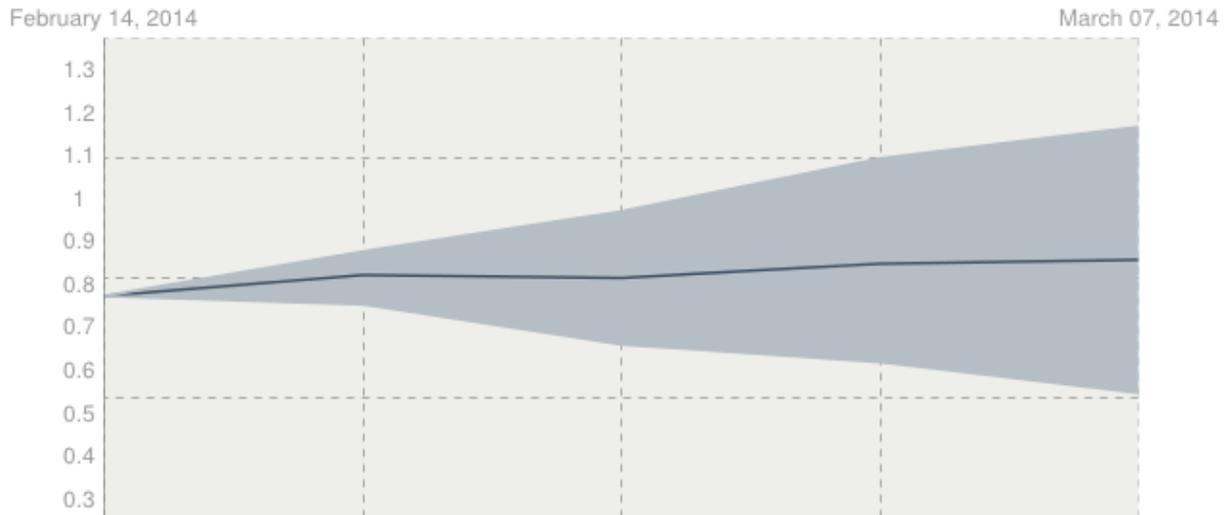

- VNTH has hit the Squeeze Trigger price of \$0.095.
- Based on the amount of value that short sellers need to cover, a short squeeze is predicted at \$0.095.
- Short Sellers will be forced to buy to cover short positions, sending the price higher.

## Pattern Scan

Tracks "Trigger Events" that positively or negatively affect the value of a stock.

Vantage Health, Inc. (OTC: VNTH) is predicted to go up in coming weeks based on bullish technical trends that have appeared in the recent performance of the stock. VNTH has demonstrated Trend Line Break(3) strategy ACT EOD with a strength of 4.0/5. The higher the strength, the higher the probability of an accurate prediction.

- The price of VNTH expected to move up in the coming weeks.
- PatternScan has detected that a 'ACT EOD' pattern has appeared.
- Specifically, a ACT EOD variant of Trend Line Break(3) has been detected.
- This indicates a high probability that VNTH will move up in the coming weeks.

## Squeeze Trigger

We have a proprietary database of all trading in US stocks and maintain massive databases of short sale and naked short sale time and sales data, along with short squeeze SqueezeTrigger prices. We are the only firm that knows the exact price that a short squeeze will start in every US stock.

The Cumulative Squeeze Trigger price for VNTH is \$0.095.

This means that now that VNTH closed above \$0.095, we expect a short squeeze to begin that could quickly drive the price of VNTH considerably higher.

## Friction Factor

Friction Factor determines if there is normal or abnormal behavior in the price action of the stock when compared to the buying vs. selling trading statistics. It shows us how many more shares of buying than selling it takes to move a stock higher by 1 cent, or how many more shares of selling than buying it takes to drop a stock by 1 cent. Here is how to understand Friction Factor:

- If Friction Factor is positive, more buying than selling caused VNTH's price to rise
- If Friction Factor is negative, more selling than buying caused VNTH's price to fall
- If Friction Factor is 0, there was no discernable activity either way
- If Friction Factor is abnormal, it means that more buying than selling caused the price to drop which is evidence of manipulative activity. In some cases more selling than buying can cause the price to increase. While this is rare, it must be noted as well. Friction Factor raw data.

## Valuation

Short Squeeze Value is a measure of a stock's current worth. VNTH has a current value of \$2.85 per share. Therefore, it is undervalued compared to its Price of \$0.12 per share. Value is computed from the average positive Friction Factor of 83,349 shares. When dividing total shares shorted by average Friction Factor we get a projected price move of \$2.85.
