WOPR

WEALTHMAKERS

WealthMakers is a Wall Street research and trading firm providing unbiased statistical stock market predictions to empower investors, securities professionals and public company employees to make precise, predictive and profitable trading decisions. Our unparalleled technology, trading algorithms and proprietary data generate confident predictions, with clear and concise objectives resulting in unique and innovative research reports that move markets and create exponential returns to our clients.

WOPR (WealthMakers Online Predictive Research) is a military-style computer that uses parallel processing, genetic algorithms, neural networks and unbridled computing power to analyze exactly what event (technicals, fundamentals, earnings, seasonality, short squeeze, group rotation, chart patterns, insider buying/selling and multiple other factors) will move each stock, in which direction, to what % degree, in the specific amount of time and with what degree of probability. Based on IBMs work on Deep Blue (now called "Watson"), this powerful database technology matched with hundreds of data feeds and the ability to find patterns, that humans cannot, has the ability to do the work of hundreds or thousands of analysts without getting tired (24 hours per day / 7 days per week).

WealthMakers Research Reports work because our Market Read strategies have a very high success rate. Both “accuracy” and “average return” and "average # of days in trade" are tracked in real-time and documented.

| Read Type | Avg Return | Avg Maturity Days | Hits | Misses | % Accurate |

Tom Ronk
Chief Analytics Officer and Founder
WealthMakers

When you experience the power of WOPR you will wonder how you ever made a trading decision without it! After 16 years and \$60 million of investment, this technology is being unleashed in the stock market and changing the way both individual and institutional investors make their trading decisions. Imagine knowing exactly what is happening in a stock, when it has happened before and what happened after the event took place. This gives you the exact probability, timeframe and percentage expected move based on real-time events and purely unemotional statistical evidence supporting your trading decision! Remember, math doesn't lie, people do.

HOW IT WORKS. WOPR is a distributed computing system that has hundreds of data feeds (economic, weather, geopolitical, interest rates, energy, equities, currencies, commodities, etc.) feeding into a relational database that searches for patterns and determines how a trading instrument has behaved both before and after specific events have taken place in the past. Only about 25% of stocks display patterns at any given time and only about 1% of stocks exhibit all the necessary conditions on any given day to make a trade. That means that out of 14,000 stocks, only about 140 trades are high probability trades that our system would generate a research report on and disseminate the information to clients. This process eliminates the noise and only tells you **which stocks have multiple strategies lining up at the same time, in the same direction, with no conflicting predictions and the fundamental valuation is in-line with the prediction!**

WOPR currently has 12 viewing panes and can be accessed at <http://www.wopronline.com>. WOPR Online is a visual display of the actual decision making process taking place in order for stocks to be selected from 14,000 stocks, 10 different strategies and hundreds of datafeeds. The machine is doing millions of calculations and determining which stocks fit the exact conditions for a trade to take place. When this massive filtering process generates a trade, it feeds that trade into **THE MATRIX**. The Matrix is WealthMakers' trading tool that can be accessed when you sign up for Power Trader at <http://www.wealthmakers.com>. Read on and we will show you exactly how to tame this tiger of a trading technology!

LOG INTO THE MATRIX

Take all the guesswork out of trading!

The user interface with WealthMakers is though the Power Trader Matrix. The Matrix automatically scans through 14,000 stocks, 10 strategies and real-time price updates to find only those stocks that have multiple predictions, at the same time, in the same direction, with no conflicting predictions and the fundamental value of the stock is in-line with the direction of the trade. This powerful technology filters out the exact long/short trades that our trading network need to enter at the precise time and price that they should be entered/exited.

WealthMakers Power Trader works because the Market Read strategies have a very high success rate. Both "accuracy" and "average return" and "average # of days in trade" are tracked in real-time and documented at www.wealthmakers.com.

**Nothing escapes
our \$ radar**

- Stock look-up capabilities – review all strategies/reports for specific symbol
- Follow – the ability to follow multiple stock symbols

Market Read - Proof Is In The Performance

WealthMakers Market Reads are dynamically generated 8-10 page research reports that visually display the specific strategies that are firing simultaneously to empower you to make a trading decision RIGHT NOW! Each strategy is described and specific time windows, percentage moves and probabilities are explained. Market Reads give investors concise, logical and compelling arguments that are easily understandable and result in the confidence necessary to MAKE THE TRADE!

EBAY is just one example!

On July 17, 2012 EBAY showed up as a trade in The Matrix. The Market Read research report to the right was generated and clients were advised that EBAY had a high probability of going from \$38.83 to \$43.31, had a short squeeze underway (SqueezeTrigger) and was undervalued compared to its \$50.17 fundamental valuation. The chart below shows what happened next. Two days later the stock hit an intraday high of \$44.44! A gain of +14.4% in only two trading days. Market Reads are a must read!

eBay Inc. provides online marketplaces for the sale of goods and services, as well as other online commerce, platforms, and online payment solutions to individuals and businesses in the United States and internationally. The company's Marketplaces segment provides the infrastructure to enable online commerce on a range of platforms, including the eBay.com platform, and its localized platforms. Its online platforms also consist of StubHub, a secondary tickets marketplace; Shopping.com, an online shopping comparison Website; Rent.com, an apartment listing service platform; and Half.com, a fixed price media marketplace. This segment also operates classifieds Websites, such as Den Bla Avis, BilBasen, Gumtree, Kijiji, LoQUo, Marktplaats.nl, and mobile.de, as well as eBay Classifieds, including eBay Anuncios, eBay Kleinanzeigen, and eBay Annunci. In addition, its eBay.com platform provides services comprising feedback forums, safeharbor programs, verified rights owner programs, customer support, pre-trade and post-trade tools and services, powerseller programs, eBay top-rated seller programs, top buyer programs, coupons and buyer rewards, and eBay buyer protection services. The company's Payments segment operates online payment solutions, such as PayPal, which enables individuals and businesses to send and receive payments online; and Bill Me Later solution that enables the United States merchants to offer, the United States consumers to obtain, credit at the point of sale for e-commerce transactions through Bill Me Later's relationship with a chartered financial institution. eBay Inc. was founded in 1995 and is headquartered in San Jose, California.

Investment Highlights

- **PATTERN SCAN** predicts the price of EBAY expected to move up in the coming weeks based on the appearance of a Trend Line Break(5+) pattern. Specifically, a ACT EOD variant of Trend Line Break(5+) has been detected. The target is \$43.31.
- **SQUEZETRIGGER** predicts that when EBAY closes above \$27.03, we expect a short squeeze to begin that could quickly drive the price of EBAY considerably higher.
- **VALUATION** EBAY has a current value of \$50.17 which means the stock is undervalued compared to its Price of \$38.84.

Knowing what is going to happen BEFORE it happens is the name of the game on Wall Street. The combined power of WOPR, The Matrix and Market Read Research Reports give investors the necessary confidence to TAKE THE TRADE before the big move happens! Click here to view the entire EBAY Market Read:

<http://www.buyins.com/reports/ebay7-17-12.pdf>

It's The Strategy - Stupid!

- **EARNINGS** Most stock price histories show random or unpredictable movements around earnings reports. But some repeat the same pattern quarter after quarter, year after year. Earnings predicts probability, price move and length of move before and after all US stock earnings reports.
- **FRICION FACTOR** Friction Factor is based on the relationship between the price of a stock and the volume at which it's bought and sold. Normal and abnormal Friction factor patterns can help you time your buying and selling decisions for maximum earnings potential.
- **GATS** The Global Automated Trading System (GATS) combines neural networks and genetic algorithms to reduce investment risks. GATS selects the highest probability trades in stocks, bonds, options, commodities, currencies and private equities, delivering precise, predictive and profitable data.
- **GROUP SECTOR** Certain institutions can exert buying or selling pressure over an entire industry group, pushing prices higher. Group Sector identifies stocks that most closely match their group's movement and generate powerful group consensus trading signals to help you profit from the herd mentality.
- **PATTERN SCANNER** describes the current technical situation in your stock. It displays the technicals, trend conditions and seasonal factors and automatically discovers how that stock has performed in the trading days following the occurrences of the event or combination of events. This technology automatically scans using complex historical queries based on what event is taking place right now in the stock. It then displays the probability, expected return and number of trading days for the expected move.
- **EVENTS** This technology automatically tracks "Trigger Events" that positively or negatively affect the value of a stock — or its perceived value among analysts — ranging from price fluctuations to natural disasters and political shifts. The results reveal patterns that can predict market movements.
- **RegSHO NAKED SHORTS** SEC Regulation SHO mandates that if a clearing agent holds a fail-to-deliver position for 13 consecutive settlement days, it must purchase securities to close out its position, a.k.a. a forced cover. WealthMakers aggregates data from NYSE, AMEX, NASDAQ, OTCBB and PINKSHEETS to track stocks that are about to have forced covers.
- **SEASONALITY** Seasonality analyzes more than 20 years of data to determine if stocks have a long or short seasonal bias, how many trading days the move is expected to last, the probability of that move and the percentage move the stock is expected to make based on the seasonal bias.
- **SQUEEZETRIGGER** Our proprietary database of more than 3,500,000,000 short sale transactions allows us to calculate the exact price at which the total short interest is short in each stock. Squeeze Trigger Alerts let you know exactly when a short squeeze will start and how to trade profitably.
- **VALUATION** A stock's value is a function of its forecasted earnings per share and forecasted earnings growth, as well as profitability, interest and inflation rates. Valuation use these metrics to determine at what price a stock is undervalued or overvalued, so that you can make investment decisions accordingly.
- **INSIDER** Significant stock sales or purchases by company "insiders" (officers or directors) can be a predictor of future price movements, up or down. The Insider strategy tracks these actions and correlates them with historical data to give you an investment edge.

Market Read Strategies Chart The Future-Before It Happens!

The chart above shows the actual predictions WOPR made that made it into the Matrix and resulted in 10 different EBAY Market Reads over the past 12 months. The reads were ALL LONG and were as follows:

2 PatternScanner, 2 Seasonality, 1 Earnings, 5 GATS

EBAY made its way from \$27 to nearly \$45 , an \$18 per share gain or +66% in just 1 year!

Market Read reports gave investors using WealthMakers technology the confidence to stay long EBAY even though the market was experiencing wide fluctuations and spooking many investors out of trades and taking losses. Market Reads stayed the course in EBAY and steered investors to phenomenal profits while weathering the market storm!

WALL ST ECOSYSTEM

Business Ecosystem - “An economic community supported by a foundation of interacting organizations and individuals - the organisms of the business world. The economic community produces goods and services of value to customers, who are themselves members of the ecosystem. The member organisms also include suppliers, lead producers, competitors, and other stakeholders. Over time, they co-evolve their capabilities and roles, and tend to align themselves with the directions set by one or more central companies. Those companies holding leadership roles may change over time, but the function of ecosystem leader is valued by the community because it enables members to move toward shared visions to align their investments, and to find mutually supportive roles.”

The power of an ECOSYSTEM is just now being understood. Apple Computer has built an ecosystem between the iMac, iPhone, iPod, iTunes, iCloud, iPad, iTV etc. The different components interact with each other (syncing) and the users of these components can relate to each other (due to the brand) and can interact with each other (due to the technology). This has created the most valuable company in the world and the concept of “ecosystem” is new. WealthMakers has built the only ecosystem on Wall Street:

StockTip Network

WealthMakers has just launched a viral affiliate network leveraging both Facebook and Twitter. The Stock Tip Network requires a \$1,000 subscription to Power Trader and users LIKE on Facebook and FOLLOW on Twitter. This frictionless marketing structure allows WealthMakers to “post” its Market Reads to Facebook and Twitter and have our customers and all friends and followers of our customers instantly see the trade post. Members of our Stock Tip Network receive a 20% affiliate commission when a member of their “like or follow network” signs up for the \$1,000 Stock Tip Network. Affiliate commissions are paid out at 20% for level 1, 5% for level 2 and 2% for level 3. WealthMakers has more than 200 people per day joining its “Like Network” on Facebook.

With 2,000 fans on Facebook, WealthMakers reaches 54,000 readers and a friend of friend audience of 1.26 million readers. This was accomplished in only 2 weeks. The viral nature of the Stock Tip Network spreads the Market Read research fast and wide and starts to generate a “self-fulfilling prophecy” influence over the price action in certain stocks. This combined with TRADE ACCELERATOR on the following page enables members of the Stock Tip Network to LEGALLY influence the outcome of their own trades!

Trade Accelerator

Members of the Stock Tip Network get access to our Trade Accelerator product which for \$199 will release the research report of their selection as a Press Release and WealthMakers will email the research report free of charge to all existing institutional holders and insiders of the company. This gives Stock Tip Network members a first-time-in-history chance to “influence the outcome of their own trade”. So once they take their position in a stock, they use Trade Accelerator to tell everyone else about it and the result is faster target price attainment and redeployment of capital into new trades.

GlobeNewswire & Comtex News

WealthMakers will announce coverage of your company with a **GlobeNewswire & Comtex News Release**

Your GlobeNewswire & Comtex News Release includes:

- Instant access to your WealthMakers Report by all recipients – your report is embedded in the press release
- Institutional distribution to the desktops of more than 1 million investment professionals via major financial databases such as Bloomberg, Reuters, Factset & Thomson
- Posting to sites investors turn to most: Yahoo! Finance, Google, Dow Jones, MSN, Factiva, Alta Vista & numerous others

Proprietary Distribution – Individuals

Reach over 24 million* self-directed online account holders with our Stock Report Coverage:

Charles Schwab

7.5 million accounts

E*TRADE

3.7 million accounts

zcco

100,000+ accounts

Fidelity Investments

10.8 million accounts

TD AMERITRADE

3.2 million accounts

Scottrade
More broker for your money.

3.0 million accounts

Clients at these top online brokerages can access your Stock Report for FREE . . . anytime, anywhere

Once Stock Tip Network members use Trade Accelerator for a specific market read, the report is automatically released across the retail network of individual investors, the institutional network of mutual and hedge funds and disseminated amongst thousands of online site and blogs so that other investors can trade in the same stock and the same direction as you, only AFTER you have entered your trade!

Find & Trade EXPLOSIVE Moves Like These!

Performance is EVERYTHING

- 28,000 Investment Advisors
- 4,000 Standard & Poor's Global Family Offices
- 12,000 Broker Dealers
- 300 Consultants

Bigger Profits with Less Risk!

Who Makes Money And How

Mom & Pop Retail: they are being mistreated by everyone and want fair profitable advice

Daytrader: they want short-term highly profitable trade setups

Stockbroker: want to gather assets under management and put people in mutual funds

RIA: want to gather assets under management and diversify in funds and stock trading

Institution: want to make long-term investments in individual stocks (low turnover)

Hedge Funds: want to make as much money as they can and will trade a lot (higher turnover)

Proprietary Trade Desks: want to make money safe, quickly and consistently (market makers)

Insiders: want to time their stock options (exercising) and stock sales (not buyers of stock)

Executing Broker: simply execute trades for hedge funds using algos (VWAP, dark pools etc.)

Journalist / Reporter: like to write stories that know something that no one else knows

So one can now distinguish between the SELL-SIDE (left side of the circles above representing online brokers and brokerage firms SELLing stuff to their clients) and the BUY-SIDE (right side of circles representing institutions, hedge funds and proprietary traders BUYing stocks for their own portfolios). So why do people on the SELL-SIDE want to talk to other players on the sell side and why do people on the BUY-SIDE want to talk to other people on the BUY-SIDE?

The only common denominator amongst all the circles above is that everyone wants to be right and they all want to make money. This means that RESEARCH is a key tool for all players because it helps people be right and determine what to buy, when to buy it, when to sell it and what amount of capital and time risk they are taking in doing so.
